Problem Solving

English Medium

Reports Evaluation

### Why learn and implement Power BI?

If you are struggling to make sense of scattered data, or wasting time on manual analysis, and lacking actionable insights for informed decision-making? Learn and implement Power BI to efficiently consolidate, analyze, and visualize data from various sources, enabling data-driven decisions for both individuals and organizations.

### Learning Objectives:

Upon successfully finishing the course, you will have covered:

- Understand the core concepts of Power BI.
- Learn to import and transform data from various sources.
- Master the art of creating compelling visualizations.
- Discover advanced techniques for data modeling and analysis.
- Gain proficiency in sharing and collaborating on dashboards.
- Harness the power of data with DAX, and Power Query.
- Explore best practices for effective data storytelling.
- Prepare for real-world scenarios through hands-on projects.

### Course Details

#### Duration

✓ 6 to 12 Hours

#### Materials Provided

- ✓ Power BI Training Videos
- ✓ Power BI User Guide
- ✓ Power BI Training Certification
- ✓ Hands on Samples

## Course Curriculum

POWER BI BEGINNER TRAINING	POWER BI ULTIMATE TRAINING	POWER BI DESIGN REVOLUTION
✓ Introduction to Power BI	✓ Introduction to Power BI	✓ Exploring different Visualizations
✓ Power BI Desktop Features	✓ Power BI Desktop Features	✓ Importing other visuals
✓ Importing Data into Power BI Desktop	✓ Importing Data into Power BI Desktop	✓ Using Advanced Visuals
✓ Power Query Editor	✓ Power Query Editor	✓ Creating Calculated Measures with DAX
✓ Performing ETL Operations	✓ Performing ETL Operations	✓ Time Intelligence Functions
✓ Creating new Tables and Columns	✓ Creating new Tables and Columns	✓ Table Manipulation Functions
✓ Understanding Star & Slowflake Schemas	✓ Understanding Star & Slowflake Schemas	✓ Relationship Functions
✓ Data Modeling Techniques	✓ Custom Sorting of Columns	✓ Understanding Context Transition
✓ Exploring all types of Relationships	✓ Data Modeling Techniques	✓ Types of Slicers and Filters
✓ Exploring different Visualizations	✓ Exploring all types of Relationships	✓ Building a Monthly Trend Report
✓ Creating Calculated Measures	✓ Cross Filter Direction	✓ Designing Report Layout
✓ Understanding basic DAX Functions	✓ Exploring different Visualizations	✓ Working on UI/UX Maximization
✓ Understanding Context Transition	✓ Importing other visuals	✓ Optimizing Report Design
✓ Types of Slicers and Filters	✓ Creating Calculated Measures	✓ Advanced REport Functionalities
✓ Building a Monthly Trend Report	✓ Understanding DAX Functions	✓ Types of Conditional Formatting
✓ Basic Report Functionalities	✓ Understanding Context Transition	✓ Bookmarking Techniques
✓ Designing Report Layout	✓ Types of Slicers and Filters	✓ Detailed Tooltips
✓ Sharing Dashboards and Reports	✓ Building a Monthly Trend Report	✓ Dynamics Visual Elements using DAX
✓ Overview of Cloud Service Features	✓ Advanced Report Functionalities	
✓ Exploring Report Publishing and Exporting Options	✓ Designing Report Layout	
	✓ Types of Conditional Formatting	
	✓ Dynamic Visual Elements using DAX	
	✓ Sharing Dashboards and Reports	
	✓ Overview of Cloud Service Features	
	✓ Exploring Report Publishing and Exporting Options	
	✓ Adding users and editing workspace	
	✓ Installing and Configuring Data Gateway	
	✓ Data Refreshing Options
